

The physical safety of staff, students, and anybody else on school property is of paramount importance. Ensuring such safety generally supercedes all other policy interpretations. To that end, the Administrator shall not fail to:

1. Adopt a plan for student and staff safety in an emergency.
2. Adopt a plan that provides for a secure building and other school facilities, and for safe and secure equipment.
3. Adopt a plan that provides for a secure online environment, especially for students.
4. Adopt a plan that provides for secure management of any sensitive data maintained online, and for the security of computer media maintained in school facilities or available for removal from school property.
5. Facilitate communications with community and emergency services providers, and ensure that communications shall be reasonably maintained in an emergency situation.
